

SVOBODA

POST-COVID RESIDENTIAL COMPLEX

The pandemic has changed the situation in the world, our lives, our vision of future. People lost their freedom in many ways. In communication, movement, travelling. This project provides not only saving and using all the opportunities we had before Covid-19 but development of alternative ways of cohabitation, travelling and maintaining healthy lifestyle, physical and mental health. It gives people freedom that in Russia means SVOBODA.

The project represents the system of temporary housing, hotel for health support, and modular living cell. A person can choose the type of housing basing on his needs at the moment. Maybe it's a rest and health improvement or maybe it's broadening his mind, exploring new places, being closer to nature without any break from work or studying.

THE SYSTEM

Imagine if People can move everywhere they want without any limits even during lockdown. Sounds unbelievable, right? In fact they can not only move but travel. They can discover new places where they would never stayed at.

They have a spectrum of choice where to live. That what we call freedom. Of what everyone felt the lack of during the pandemic. That's our proposal. Not the residential complex but feeling free.

The system of living represents the wellness maintaining residential complex intended for a pro term life and improving your health. A person can get just a capsule or a suit with a capsule included.

The capsule KAPLYA (ru.tr.- a drop) provides a man with a bed, working space, toilet and changing scenery view. KAPLYA walks while you are working. It gives you an opportunity to travel and explore new places, meet friends and go out. In other words, your bed or workspace turns into a car.

"KAPLYA" (ru.- a drop) is an eco-capsule for unlimited life. For a human to feel free again without any boundaries. You don't have to share any space with anyone, no one can bother you and your privacy. Or on the contrary you can finally meet your friends or family somewhere unusual. Place you haven't ever seen before. It's all up to you.
